BAMBOO & OAK
FLOORING SPECIALISTS

ecodure

Ecodure Bamboo flooring has it all, it's sustainable, durable, dent and scratch resistant and even cost effective... The benefits of an Ecodure Bamboo floor just keep coming.

Ecodure Flooring are New Zealand's most experienced Bamboo supplier, offering personalised service and advice, selling only the highest quality Bamboo Flooring.

Our customers include New Zealand's leading home building companies, architects, developers, designers and countless home owners.

durable

Compressed or strandwoven Bamboo is the hardest "wood" floor on the market, with dent resistance ratings which far out perform other hardwoods.

Flooring may be laid either floated over an underlay or directly glued to particle board, plywood or professionally sealed and cured concrete.

Our products come pre-finished with seven layers of eco-friendly water-based matt polyurethane. This includes two layers of Klumpp's world leading anti-scratch technology. There is no sanding or polyurethaning on site. The manufacture of both the flooring and finishing meet the stringent E0 European standard for formaldehyde emissions.

sustainable

Bamboo is the sustainable choice for flooring – it's harvested from Chinese Moso Bamboo, which unlike forest trees once harvested, quickly sprout again to grow to full height within four to five years. This giant grass also sequesters more carbon than regular forest trees.

allergy friendly

Bamboo floors are ideal for people who have dust or pet allergies. The tight UNICLIC WaxPro coated joints mean there is little chance of dust mites or pet dander gathering. A regular swish with a microfibre dust mop and a spray bottle of water is the only regular maintenance required.

Planks should be dispersed evenly during laying. Ecodure Bamboo Flooring is not recommended for wet areas such as bathrooms.
